

Los Angeles Unified School District

Facilities Services Division

DAVID BREWER, III
Superintendent

GUY MEHULA
Chief Facilities Executive
Facilities Services Division

February 15, 2008

Dear Industry Partner,

I am pleased to invite you to participate in the Los Angeles Unified School District's iSEE (I'm a Student Exploring Excellence) Architecture & Engineering Internship Program. This exciting two-phase program is designed to engage, expose and challenge LAUSD high school juniors and seniors to explore architecture, engineering and construction as career opportunities.

For the 2008 iSEE Program, we partnered with the Los Angeles Community College District to offer our students a college-credit course to learn AutoCAD. Through this course, we increased the work and education skills of our students, making them more marketable to future employers. Following this course, students will participate in an industry seminar series that will expose them to the fields of architecture, engineering, construction and construction management. The final phase of the program will provide students with industry work experience through a six-week, paid internship position with iSEE Industry Partners.

I hope that your firm will be interested in becoming an iSEE Industry Partner by hiring student interns this summer, beginning July 21 through August 29, 2008. Additionally, we seek iSEE Industry Partners who can provide this six-week internship during the fall and winter, in order to accommodate a similar internship experience for students who attend school on a year-round academic calendar.

Enclosed are information materials regarding the iSEE Architecture & Engineering Internship Program and an "Industry Partner Commitment Form" that I encourage you to consider in order to begin a partnership with the students of LAUSD. Please contact Guelsy Gomez, iSEE Program Coordinator, at (213) 241-4979, if you have any questions.

I look forward to welcoming you as an iSEE Industry Partner.

Sincerely,

A handwritten signature in cursive script that reads "Guy Mehula".

Guy Mehula
Chief Facilities Executive
